

DASH

Dash Core Group Q4 2017 Update

How this Call Works

- **We record this call** and share it on the Dash [Youtube channel](#)
- Audience microphones are muted
- Questions can be submitted on the chat window
- Moderator: Ryan Taylor, CEO
- Operator: Robert Wiecko, Head of Project Management

What We'll Cover

- Welcome and Introduction
- Goals + Strategy
- What is Evolution
- Team Updates
- Metrics
- Summary
- Community Questions

Why We're Here

Goal

Increase financial freedom and opportunity, by providing a payments network that lets everyone do more

Value

The Dash network provides the easiest-to-use payments-focused blockchain for individuals, merchants, businesses, and developers. Dash Digital cash provides control over payments. The Dash ecosystem provides access to opportunities.

Benefits

- Fast: <2 second Instant Send transaction, <13 minute standard transaction
- Cheap: near-zero fees (.0001 Dash per InstantSend, .00001 Dash per standard transaction)
- Secure: blockchain cryptography, with optional privacy enhancements
- Choice: send anywhere, any time
- Access: 650+ merchants, 40+ exchanges, 137 countries
- Services: ATM, debit card, bill payment, consumer, compliance, and broker services
- Transparent: Self-governed, self-funded, open-source, public blockchain network

Strategy for Growth

Product

Understand user needs and solve user problems
Create simple, easy ways to use Dash
Launch Evolution

Ecosystem

Market directly to individuals and merchants
Develop merchant and channel business partners
Drive development projects to Accelerator

Organization

Build a great organization, great teams, great people
Establish New Zealand trust organization
Professional Employee Organization on-boarding
Scale business activities (finance, business dev, marketing)

Network

Advance academic partnerships and scaling research
Experiment with Dash Labs on future technologies, projects

Evolution: What We're Working On

Evolution is an update to the Dash protocol (v13) and includes new Dash products that prioritize user-experience. The goal is a payments platform that will make Dash so easy anyone can use it.

Protocol Upgrades

DIPs (protocol specs)

Code: DashCore, DAPI, DashDrive

DashPay Wallet (Android / iOS)

Create accounts with human user names, store contacts, sync across devices, and send payments, all on the blockchain.

Purchase from websites and mobile apps with ease, from any device, with only a few clicks .

DAPI-SDK

Create applications with an SDK to make DAPI interactions simple.

Access the network from light clients without sacrificing security.

Add Dash payments to websites or mobile apps, plug in a few lines of code & you're running.

Design Requirements

Users register with a username and passphrase to interact on the network.

User data-state is maintained in the Masternode P2P network, eliminating the need for users to hold information outside of the network.

Merchants don't need to integrate the data structures required to connect and interact with Dash users.

API, not P2P-based clients: No requirement (or need) for clients to interconnect directly or be discoverable in the protocol, removing the need for end-users to require special software and interact as a node in the network.

Software Development

Q4 Achievements

Workshop in Hong Kong

Launch of Evolution Development

Integration of Evolution Components

Internal v.13.0 Masternode build

Massive work done on Bitcoin backports

Repaying technical debt quickly

People

7 new devs (2 Backend, 2 UI/UX, 3 Mobile)

Q1 Plans

Design

Publish Evolution DIPs

Release Tech Specs

Development

Align process

Re-start Agile workflow

Implement Scrum

Delivery

Copay transition

Evolution Alpha Integration Testing

Internal Devnet implementation

People

Hire backend developers, QA engineers, UX designer

Business Development

Who We Help and What We Offer

Individuals

For financial technology fans in modern economies to underbanked users in destabilized economies. Every day users and every day transactions.

Merchants

For e-commerce store owners to point of sale retail transactions.

Businesses

For business-to-business and business-to-consumer providers of payment products and services. Card networks, card issuers, payment gateways, exchanges, brokers, processors, independent sales vendors, and API providers.

Developers

For developers, startups, and innovators to improve industries and benefit end-users.

Dash Wallet

Easily move your money whenever and wherever you want, instantly with near-zero fees, secured on blockchain technology.

Dash Payments

Expand market access and integrate new customers with ease. No third-party infrastructure, chargebacks, or delays. Near-zero fees.

Dash Integrations

A ready-made payment network, with instant settlement, built-in security, free of costly infrastructure.

A ready-to-use software API

Dash Accelerator

An easy-to-submit proposal process that takes 0% equity

How We Plan to Grow

Strategy

Identify opportunities to scale efficiently

- Focus on business partners
- Target channel partners, fiat on-ramps
- Create easy experience for merchants

Develop where Dash makes most impact

- Distressed markets
- Destabilized economies
- Unbanked populations

Build global presence + regional managers

- US/CAN
- LATAM
- EMEA
- APAC

Relationships

Partner Program

Increased transactions, customers, business opportunities

Personalized support, strategic planning, joint activities

Business Solutions + Dash Integrations

End-to-end solutions for payment pain points

Account management

Strategic marketing & promotion

Integrate partners in business solutions

Merchant Acceptance + Dash Payments

Simple and standardized processes

User-friendly merchant on-boarding

Supportive marketing & promotion

Q4 Achievements

People

Hired Global Business Development Director

Fiat gateway expansion

Uphold, Mercury Cash, Quoine, Kuvacash

Channel partner expansion

Alt Thirty Six

Consumer Services

Wirex

Q1 Achievements to Date

People

Hired Regional Manager - Business Development (US/CAN)

Fiat gateway expansion

BitInka

Channel partner expansion

GoCoin, StrikeSocial, Bitnovo

Consumer Services

Piiko, Morphtoken, Bitrefill

Q1 Plans

People

Build LATAM + EMEA team

Tools + Data

Get tools in place

Define metrics

Engagement Plan

Create customer journey maps

Collect partner feedback

Design product & service offerings

Onboard Additional Partners

Marketing & Communication

Q4 Achievements

Rebranding

Ogilvy branding and marketing campaign
Ogilvy user research on logos and icons

Public Relations

Contract with WPR renewed

Conferences

Money2020 Vegas, Zug, Kiev, Warsaw...

Press

Mainstream and crypto-media

Wiki and [dash.org](#)

Extensive Wiki content updates

Q1 Plans

Rebranding

Finalize visual design and style guide
Onboard research and design firm (brand + product content, website redesign)

Marketing plan

Develop marketing plan first draft

Conferences

Event calendar

Ad campaign

Online advertisement tests and user research

People

Hire marketing managers

Business Organization

Q4 Achievements

Legal Entities Setup

New operating legal structure

Recruitment Support

Recruitment tool and process
Roles definition

Delivery Model

Definition and improvements
Scrum implementation launch

Hiring and on-boarding

10+ new contributors onboarded

New Org Structure

Definition of the management structure

Q1 Plans and Goals

People

Hire CFO, CMO, CTO
Retention program

Organization

Finalize NZ trust structure
PEO on-boarding
Contractor / employee conversion

Finance

Diversify banking relationships

Delivery Model

Scrum implementation workshops

Reporting

Internal reporting
Community updates

Research partnerships

Develop research w/ ASU Engineering
Explore projects w/ ASU Business School

Intellectual Property

Patents

Finance

Income Statement

To provide a more relatable accounting picture, Dash's accounting is denominated in USD

Core team collected ~\$4.26 million from the network in 2017 (as measured at the time of distribution) - this includes escrow for various third-party projects

Because of the price increase during the period, Dash experienced \$11.2 million in currency gains; currency gains were more financially significant than our budget system draws

Uncategorized expense and income are generated by DASH to BTC trading [the difference is trading losses of \$1,279]

Other expenses included \$50k donation to ASU and a proposal advance to Alt36

Profit and Loss	
January - December, 2017	
	Total
Income	
Dash Budget System	4,257,523
Uncategorized Income	338,238
Total Income	\$4,595,761

Exchange Gain or Loss	-11,192,378
Total Other Expenses	-10,550,471
Net Other Income	10,550,471
Net Income	10,017,736

Balance Sheet

Cash assets at the end of Q3 2017 totalled ~\$10.1 million, up from ~\$0.08 million at the end of 2016

Significant reserves existed at the end of the year in the business development budget, the core team salaries budget, and the external contractor budgets

Because of currency gains, we discontinued funding requests for most budget categories in 2017

Excluding escrow services, DCG requested only 2,301 Dash in Q4 as we continue paying expenses from our existing balances

Dash		Balance Sheet	
As of Dec 31, 2017

CEO Summary

Q&A Session

ampp

- What type of proposals does the core team feel is lacking in the community Q4 2017 & Q1 2018?
- How satisfied is core with the growth rate of the team to date?
- How much growth do we expect to see in 2018?

thedesertlynx

As far as Github commit access (including Evolution's private repo), sporks, and other essential access, is there a contingency plan to pass these on in case of a catastrophe befalling the Core team so that Dash continues on without losing years of development work?

GrandMasterDash

What are the most pressing improvements needed to the treasury system?

bigrcancda

- Who would spear head and can we get support from core to have a full time communications and support team that would be dedicated to updating our development status as well as customer and merchant support?
- Is there a plan to create a merchant support team? Again currently fragmented and not easily discovered.

TanteStefana

- When will 12.3 be in open testnet?
- When will 13 be in open testnet, or how long after 12.3 do you project it will take?

bhkien

What do you think are our target users to attract?

strophy

When you pitch Dash as a potential payment system to a vendor/integrator, how much comparison to our competitors is involved? Are entities like Dash Core as a central point of contact seen as an advantage or disadvantage from their point of view? In general, how do you approach these meetings?

t0dd

The Evolution team is probably the right size at this point. But, other teams are likely needed: Integration team, mobile, desktop, web team, crypto-security-analysts, merchant tools team, sales engineering, etc. Maybe it would be good to move some of these outside of Core Group. The challenge: Dash Corp Group is already challenged with engaging with the community, it will be possibly even more challenging to work with outside entities.

(anonymous)

Have you planned to have one or more structures that can serve as parent company to projects funded by the treasury?
